DETAILED ACTION

STATUS OF CLAIMS

Claims 1-26 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13 are, drawn to a process for preparing compounds of formula (I), classified in class 544 and 546, in various subclasses.
- II. Claims 14-18 are, drawn to a process for preparing compound of formula (I), classified in class 544, subclass 118+.
- III. Claims 19-24 are, drawn to a process for preparing compounds of formula (I), classified in class 544 and 546, in various subclasses.
- IV. Claims 25-26 are, drawn to a process for preparing compounds of formula (I), classified in class 544,

Groups I-IV are drawn to four distinct processes of preparing compounds of structural formulae (I) as demonstrated by the different reactive steps and reactants. Additionally, the inventions of Groups I-IV are independent and distinct because there is no patentable co-action among the various groups and a reference anticipating one member will not necessarily render another obvious.

Furthermore, because of the different classes and subclasses and divergent subject matter in each of the Groups, a serious burden is imposed on the examiner to perform a complete search of the defined areas. Therefore, for the reasons given

Art Unit: 1626

above, the restriction set forth is proper because it would constitute an undue burden on the examiner to examine all of the inventions in this application.

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventors must be amended in compliance with 37C.F.R. 1.48(b) if one of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 C.F.R. 1.48(b) and by the fee required under 37CFR 1.17(i).

Because of the plethora of classes and subclasses involved, a serious burden is imposed on the Examiner to perform a complete search of the defined areas.

Therefore, because of the reasons given above, the restriction set forth is proper and not to restrict would impose a serious burden in the examination of this application.

A telephone call was made to Kenneth R. Walton on 03/20/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in

the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
